

Every year millions of pounds of food packaging waste litter our roadways, clog our landfills and spoil our quality of life. There are “no free refills” for our forests! Southern forests, the jewel of the American landscape, are being destroyed to bring us fried chicken, burgers, and super-sized convenience in a glut of paper packaging. Using simple options and creative solutions,

YOUR COMPANY can:

- Reduce the amount of excess and destruction
- Increase the use of post-consumer recycled paper
- Increase the use of FSC-certified paper products

Sincerely,
